PERSONALITY AND BEHAVIOUR

Paul loves to solve tricky puzzles. In the evenings, when his two children are in bed, he enjoys the calm atmosphere where he can fully concentrate on these brainteasers. Solving logic problems has been one of his favourite hobbies since his childhood.

Paul likes it, when he can concentrate on one thing at a time. Also at work, in order to be able to do a good job, Paul tries to minimise all distractions and technical hurdles that would disturb his workflow. Therefore, he is easily upset when he feels that technologies and the technical infrastructure is slowing him down. He is glad that his workspace is in a separate room at the laboratory, where he can fully concentrate on his work.

SKILLS & KNOWLEDGE

clinical medicine neuropathology

accuracy and precision sense for details

structured working style conscientiousness

MOTIVATIONS

rejoice in his work make correct diagnoses

responsible job solving difficult cases

gaining recognition for his work

OCCUPATION

Since more than 20 years, Paul has been working at a pathology laboratory in Austria. He is a specialist for neuropathology. His routine work comprises macropathology (cutting and grossing specimens) as well as microscopic examination of specimens in order to make diagnoses. In tumorboards, Paul discusses oncology cases with colleagues from other medical disciplines. Paul is well-known for his ability to solve difficult cases as well. He is frequently asked by pathologists from other institutes to provide a second opinion. Paul likes his job very much. However, sometimes he feels that he has got too much secondary tasks, such as administrative stuff, meetings or phone calls, which keep him from doing his main work efficiently.

FRUSTRATIONS

administrative stuff disturbance in workflow

ignorance of pathologists' work work overload

unnecessary delays insufficient clinical information

VALUES & ASPIRATIONS

working efficiently doing his job well

family and nature

OBJECTIVES AND GOALS

Paul wants to make correct diagnoses, so that each patient can receive the right therapy. As a responsible pathologist, Paul always strives to work concentrated to avoid mistakes.

ATTITUDES TOWARDS AI

Paul thinks that in order to be useful, new technologies must integrate well with his workflows and help him to work more efficiently. Before he is willing to use a technical solution in diagnostics, he would have to be absolutely sure that this solution is trustworthy and delivers correct results.
